

PRODUCT CATALOG SMACK MOBILITY

Q1 2023

SUMMARY

KIREST is a company specializing in the distribution of electric urban sliding products since 2014

ELECTRIC MOPED SCOOTERS & MOTORCYCLES

Hybrid means of transport, between the scooter and the bicycle, the city Coco scooter is suitable to meet the requirements daily

ELECTRIC KICK SCOOTERS

A large selection of electric scooters is available to you at competitive prices. Efficient, they will accompany users for family leisure or daily journeys.

ELECTRIC BIKES

Discover our electric bikes and balance bikes, ideal for your daily commute!

HOVERBOARDS

Fully electric means of transport, this popular vehicle is a hit with young people.

IN REGARDS TO

Who are we?

The KIREST company created in 2014 by two passionate Parisians is today a French reference in terms of B2B distribution of products of urban mobility. Convinced that these new means of transport are the future of urban and interurban mobility, they design a model eco-mobile. Very effective alternatives over short or medium distances, they know neither traffic jams nor full parking lots!

Proud to offer an ecological mode of transportation, KIREST wants to discover to its users the pleasure and comfort of traveling scooter, bicycle or electric scooter.

KIREST®

L'ART DE SE DEPLACER AUTREMENT

Dear (future) users, dear (future) users

KIREST is delighted to present its catalog to you

You will see, at first glance, that KIREST puts every effort to meet your requirements in terms of quality, performance, comfort and price.

KIREST occupies an important place in the urban mobility, largely thanks to the trust that you grant us, and for which we give all our gratitude.

We will make every effort to continue to improve, each year, your conditions of use.

The direction.

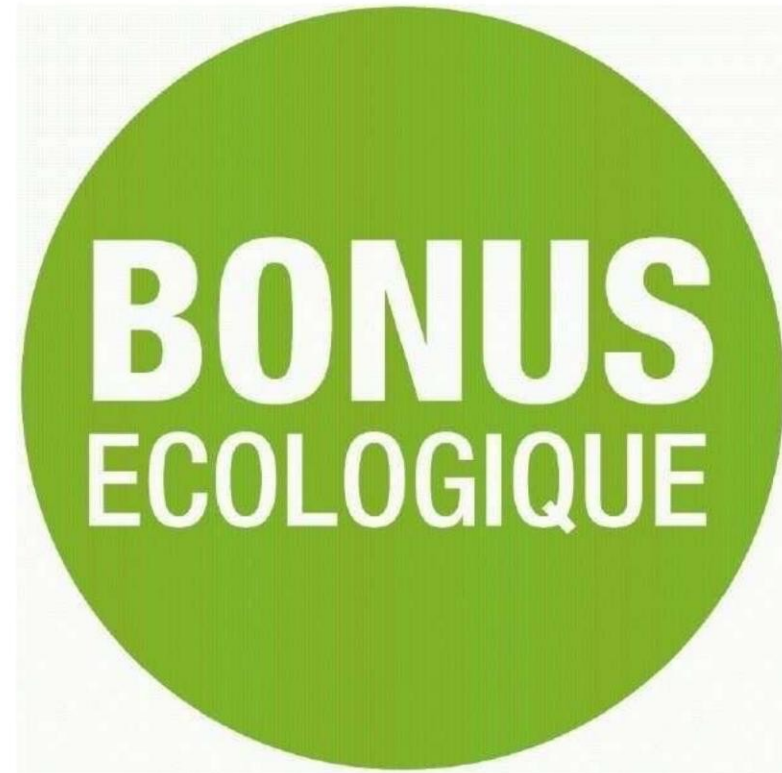

Scooters & Electric Motorcycles

So as not to go unnoticed!

A hybrid means of transportation, between scooter and lift, the electric scooter is suitable to meet the requirements daily

Ecological bonus : **Up to €2,000.00 reimbursed !**

COOPOP

Discover the Coopop!

It's bigger than you think and comfortable even for those with shorter legs.

These two super trendy machines belong to the L1 category, which is equivalent to the 50 cc market.

They can therefore be driven from the age of 16 and are limited to 45 km/h. They are automatic.

This automatic motorcycle picks up speed faster than you imagine and is sure to leave the gasoline 50cc behind it. They use LG lithium batteries and are powered by a

Bosch motor on the rear wheel. The battery is easily removable, can be charged indoors and weighs about 10 kg. The weight of the vehicle with the battery is 45 kg, and 35 kg without. With a load complete, you can expect to travel about 50km in average use

CLASSICA 3000

Discover the Classica 3000!

This is the new Vintage-style model inspired by the famous 'Vespa'. We haven't reinvented 'Vespa', but we have improved it, because within this 'old motorcycle' facade lies the technology of the present and the future. Driving around town with the Roma not only reveals a sense of science and technology, but also reflects a unique personality and passion. The classic hydraulic shock absorption system is more than adequate to cope with all kinds of road conditions. It not only brings classic visual enjoyment in appearance, but also boasts of its impeccable design. Ideal for roads and motor vehicle areas, 100% electric moped without the complex maintenance of thermal motorcycle.
